

## **CHARTERS by AIR DENVER - Information Sheet**

CHARTERS by Air Denver is a "Worldwide Air Charter Referral Service" that locates the right aircraft for your charter needs in the least amount of time - *We have been doing it since 1981!*

Air Denver has an "Aircraft Locator System" that keeps comprehensive and pertinent information on more than 3,900 charter and airline companies in North America and their 18,000 plus aircraft.

**Check out our ONE WAY pricing for charter aircraft!** Air Denver maintains a list of aircraft that are available for one way flights at a significant discounted rates.

Air Denver is a referral service and not a broker. The difference is that once the aircraft is selected, we put you in direct contact with the charter company or airline. And you pay them, not us. However, we still stay in the middle to insure a smooth flight. The following is an overview of how Air Denver's Aircraft Locating System works and a look at some of the other aviation services we provide:

When you call Air Denver, our charter specialist will evaluate your request and let you know immediately if a charter aircraft will meet your economic needs.

By calling Air Denver you have placed yourself in contact with thousands of charter and airline companies. Our computer will search through the 18,000 plus aircraft in our database and find the most economical aircraft for your charter. Our Aircraft Locating System assures you of a good price, and it does it quickly!

Once an aircraft is selected, Air Denver places the customer in direct contact with the charter operator. We then provide both parties with all the details necessary for a smooth flight.

We provide the customer with a confirmation letter which contains the following information: the company operating the aircraft; the aircraft type and class; seating capacities; pilots' names, and the facilities to be used during the charter; and the facilities' phone numbers. We even provide the aircraft's colors and registration numbers so that people meeting you can more easily find you at the trip's end.

For the charter operator we provide necessary billing information along with a passenger manifest. We also list the Fixed Base Operators that will be used.

Chartering large airliners is a specialty of Air Denver. We can provide single "ad hoc" charters, as well as multiple flights and we can even set up your own airline.

Some of our additional services include: providing back up or sub-service to scheduled and non-scheduled air lines when mechanical problems arise with their own aircraft; leasing and purchasing large aircraft, and setting up public charters such as taking sports fans to various events.

These are a few areas Air Denver can help you with your charter needs. When it involves aviation, we probably have done it, or we have the resources to solve your needs. Just give us a call with your itinerary and airline price you are trying to match or beat. We can usually tell immediately if chartering an aircraft will be economical for your needs.
